LIQUID NUTRIENTS
**LESCO® IRON PLUS**

**LESCO® LIQUID MICRONUTRIENT SUPPLEMENTS**

**FEATURES**
- Promote Superior Color - a lush, healthy green without the excessive growth associated with high rates of nitrogen.
- Control winter desiccation, winter kill and fungal diseases.
- Help reduce nitrogen groundwater contamination.
- Slow “dark respiration” and boost energy reserves.

**LESCO 4-0-5 CHELATED IRON PLUS**
- Micronutrients for Turf and Ornamentals
- Reduced Staining Formulation
- High Technology Chelating agents provide quick and efficient uptake into the plant with minimal loss due to soil tie-up.

**Packaging**
- 510477 (2.5 Gal)

**LESCO® 12-0-0 IRON PLUS**
Promotes a dark green, healthy turf color. Provides iron and manganese to stimulate the synthesis of chlorophyll. The nitrogen-sulfur-iron-manganese bond is very stable, preventing the tie-up of micronutrients in acidic soils.

**Packaging**
- 084039 (2.5 Gal) - 084042 (55 Gal) - 081886 (275 Gal)

**LESCO® 12-0-0 CHELA TED IRON PLUS**
A premium liquid micronutrient product for foliar or soil drench application. The stable blend of nitrogen, iron and manganese chelates delivers excellent color without surge growth. Chelation ensures optimum nutrient absorption.

**Packaging**
- 084039 (2.5 Gal) - 084045 (55 Gal) - 082852 (275 Gal)

**LESCO® 12-0-0 CHELA TED IRON PLUS ZINC**
An iron, manganese and zinc micronutrient blend compatible with amine herbicides for tank mix applications. Zinc is deficient in many areas, especially in western states, and combinations of zinc and iron provide extended color duration in these environments.

**Packaging**
- 084043 (2.5 Gal) - 084052 (55 Gal)

**LESCO® MANGANESE HIGH COMBO**
An excellent source of essential micronutrients, especially in areas with manganese-deficient soil. Manganese high combo contains necessary secondary micronutrients in a form that promotes rapid plant absorption and excellent color response on all types of turf. The chelating agent, a modified lignin extract, produces one of the lowest foliar chelate phytotoxicity rates while ensuring effective feeding.

**Packaging**
- 084053 (2.5 Gal) - 084037 (55 Gal) - 082851 (275 Gal)

**LESCO® CHELA TED MICRO MIX**
Designed for use where soil or tissue tests indicate multiple micronutrient deficiencies. Chelated Micro Mix contains a superior blend of essential micronutrients. It is a highly effective source of magnesium, sulfur, copper, iron, magnesium, molybdenum and zinc. These chelated micronutrients are highly effective with low salt density and minimal toxicity to turf and ornamentals.

**Packaging**
- 084047 (2.5 Gal) - 084048 (55 Gal) - 082848 (275 Gal)
LESCO® GREEN FLO™

TARGETED TURF PROGRAMS

FEATURES

- Developed specifically for lawn care operators, grounds management professional and the golf superintendent.
- Choose from a versatile collection of formulations—each delivers a customized solution to specific turfgrass problems.
- Many Green Flo™ products contain slow-release Urea-Triazone nitrogen for extended feeding and for increased nitrogen translocation and remobilization within the plant.

LESCO® GREEN FLO™ 18-3-6 50% CRN
A nitrogen, phosphorus and potassium fertilizer solution with sulfur, iron and Urea-Triazone slow-release nitrogen for feeding turf grasses, trees and ornamentals. Sulfur is available in two forms and aids in efficient nitrogen utilization. Promotes drought resistance and winter hardiness.

Packaging
- 052447 (2.5 Gal) - 052438 (30 Gal) - 082019 (275 Gal)

LESCO® GREEN FLO™ 18-0-6 50% CRN
A zero phosphorus nitrogen and potassium fertilizer solution with sulfur, iron and Urea-Triazone slow-release nitrogen for feeding turf grasses, trees and ornamentals. Sulfur is available in two forms and aids in efficient nitrogen utilization. Promotes drought resistance and winter hardiness.

Packaging
- 052447ZP (2.5 Gal) - 052447ZP30 (30 Gal)

LESCO® GREEN FLO™ 0-0-25
A clear, chlorine-free, non-acidic potassium solution containing 17% sulfur. Addresses summer decline symptoms and promotes natural resistance to disease and insects.

Packaging
- 052443 (2.5 Gal) - 052431 (30 Gal) - 090650 (275 Gal)

LESCO® GREEN FLO™ 8-8-16 40% CRN
Contains all three primary plant nutrients for a complete tank mix additive or for stand alone application. High levels of potassium offer summer stress relief. Slow-release nitrogen provides extended feeding.

Packaging
- 052445 (2.5 Gal) - 052445-30 (30 Gal)

LESCO® GREEN FLO™ 30-0-0 50% CRN
A 100% nitrogen solution with 50% of the nitrogen derived from slow-release Urea-Triazone. Delivers additional turf safety, increased nitrogen absorption, translocation and nutrient mobility.

Packaging
- 052452 (2.5 Gal) - 052442 (30 Gal) - 052440 (275 Gal)

LESCO® GREEN FLO™ 12-0-12 50% CRN
A premium quality nitrogen/potassium fertilizer solution with sulfur and slow-release nitrogen for the feeding of turf grasses, trees and ornamentals. Slow-release Urea-Triazone nitrogen provides superior turf color and reduced clipping volumes.

Packaging
- 082971 (2.5 Gal) - 082973 (30 Gal) - 510532 (275 Gal)

LESCO® GREEN FLO™ HUMIC SUPPLEMENT
This concentrated bio-stimulant solution of humic acid rejuvenates the soil, stimulates the root systems, promotes soil pH stability and enhances the effectiveness of future fertilizer applications.

Packaging
- 082977 (2.5 Gal) - 082985 (30 Gal) - 088703 (275 Gal)

LESCO® GREEN FLO™ 8% CALCIUM CHELATED
A chelated macronutrient that aids in the building of the cell wall within the turf grass plant. Strong cell walls can help in resistance to plant pathogens. Plants with high levels of calcium have an increased tolerance to many other stress conditions such as drought and close mowing.

Packaging
- 510312 (2.5 Gal)

LESCO® GREEN FLO™ 5% MAGNESIUM CHELATED
A liquid formulation designed to correct and prevent Magnesium deficiencies. Magnesium is an important secondary nutrient, very essential for photosynthesis, since it is part of the chlorophyll molecule.

Packaging
- 510313 (2.5 Gal)

LESCO® GREEN FLO™ PHYTE
The stress-reliever for high-traffic turfgrass. This foliar applied solution contains potassium phosphite to promote shoot and root formation, enhance metabolic balance and strengthen resistance to disease. May be applied throughout the growing season.

Packaging
- 082982 (2.5 Gal) - 082985 (30 Gal) - 088703 (275 Gal)

LESCO® GREEN FLO™ PHYTE PLUS
This clear solution is highly soluble and is quickly absorbed into the plant. It can be absorbed through the plant tissue or through the root system allowing for improved plant growth and vigor. Phosphate nutrients are known to quickly correct deficiencies and improve overall turf quality.

Packaging
- 510311 (2.5 Gal)

NITROGEN STABILIZER

LESCO® U-PLUS NITROGEN STABILIZER
- Extended, consistent response with exceptional color
- LESCO U-Plus Nitrogen Stabilizer is a uniquely formulated fertilizer additive for urea and urea ammonium nitrate(UAN) fertilizers

Packaging
- 510489 – (25 Lb. Pail)
